

MANAGING WITH AGILE

A more nimble and effective approach to management

Adopt agile and say goodbye to wasting time

This **Consulting Cohort™** is designed for leaders who have already established their strategic goals and are looking for a more effective way to execute their plans. **Managing with Agile** will help you eliminate wasteful meetings, grow cross-functional team productivity and alignment, and increase capacity for nimble decision-making for only **\$2950**.

Group Sessions

Learn repeatable skills and disciplines that will make your team more effective throughout this cohort and during future initiatives.

Private Consulting

Meet with your dedicated consultant each week to explore challenges, discover opportunities, and receive personalized advice.

Scoping & Prioritization

Define opportunities, create a timeline, and select key stakeholders to participate in projects that support your strategic goals.

Sprint Boards

Organize projects into short intervals called sprints. The sprint board is a dynamic visual representation of tasks for leaders and individual contributors.

Daily Stand-Ups

Replace long, ineffective meetings with regular team check-ins to note road blocks, help requests, and completed tasks.

Sprint Retros

What went well, what didn't, and what's next? Review each sprint with your team to uncover gaps, highlight road blocks, and reveal next steps.

Why Join a **Consulting Cohort™**?

The outdated approach to consulting is too expensive and rarely provides the practical tools you need to uncover opportunities and solve your real problems. Consulting Cohorts™ were designed intentionally to provide professional services with more value from anywhere for less money.

More Value

Only pay for 1-on-1 time when you need it with no added costs.

More Accessible

Log-in from work or home and collaborate using innovative tools.

More Collaborative

Communicate differently and include more perspectives.

More Effective

Solve the right problem and gain skills to handle the next challenge.
